

Ultra robust blocks important lengths

Bloc ultra compact grnades longueurs
Anticaídas retráctiles largos
Ultra-lange Hörensicherheitsgeräte

Code N° IHRA

FALLPROTEC

September 2018

Description

The IHRA range is specially designed for industrial applications where the end user must be rescued from the top. It is a flexible solution for confined spaces or above machineries. In case of a fall, the mechanism locks within 50cm.

Advantages

- Easy use
- Stops fall within the first centimeters
- Absorbs the energy when stopping a fall
- Wide range of available fallarresters to match every configuration
- Highly resistant and durable
- Equipped with pulley to lift the user if needed
- Works when the block is horizontal

Compliant with EN360:2002
MADE IN EU

x 1

Technical specifications

Delivered with an user manual
Material : Aluminium carter /
Galvanized steel cable
